Scope-of-Work Checklist

What to include in every estimate to avoid disputes and scope creep.

- Exact materials and quantities (not just "flooring" — specify type, brand/grade, and square footage)
- Every task included, stated plainly (e.g. "remove and dispose of existing flooring")
- What is explicitly NOT included, if it could be assumed otherwise
- Who supplies materials vs. labor-only pricing
- Estimated start date and expected duration
- Payment schedule (deposit, milestones, final payment)
- How long the price is valid for (30 days is standard)
- What happens if the customer wants changes mid-job (point them to the Change Order form)
- Site access requirements or customer responsibilities (e.g. clearing the work area)
- Warranty or guarantee terms, if any
